

PUBLIC STAFF WORKSHOP

DISCUSSION OF SALINITY OBJECTIVES FOR AGRICULTURE IN THE SOUTHERN SACRAMENTO – SAN JOAQUIN DELTA

November 4, 2008
at 1:00 pm
Cal/EPA Headquarters
1001 I Street, Sacramento, CA
Sierra Hearing Room
Conference Line: 916-255-4044*

AGENDA

This meeting is primarily a progress update, and an opportunity for questions and any new input from the public.

- I. Progress Review Crop salt tolerance study with Dr. Glenn Hoffman***
 - Literature review (including list of documents provided to Dr. Hoffman)
 - Southern Delta crop, soils, and other data
 - Conceptual review of steady-state vs. transient models
 - Recommendations for subsequent transient model analysis
 - Recommendations for other studies as needed

- II. Status of available transient soil water salinity models**

- III. San Joaquin River and southern Delta flow / water quality modeling**
 - Southern Delta salinity
 - Coordination of upstream San Joaquin River analysis

- IV. Next steps in Water Board processes**

- V. Public comments and discussion**

*No password is required for this conference line. This meeting will not be broadcast via the internet.

*Please note: this update will NOT involve a substantive discussion of Dr. Hoffman's findings to date, as his work is still in progress (not scheduled for completion until December 31st).
Dr. Hoffman will not be present at this meeting.
